

**Do you have the following problems
with your hydrocyclones?**

- Rapid wear of the lower nozzles
- Piercings
- Unsticking of the linings

Consequences:

- Reductions in production capacities
- Unexpected shutdowns for repair

MAKE YOUR HYDROCYCLONES RELIABLE WITH PRODUR

PRODUR:

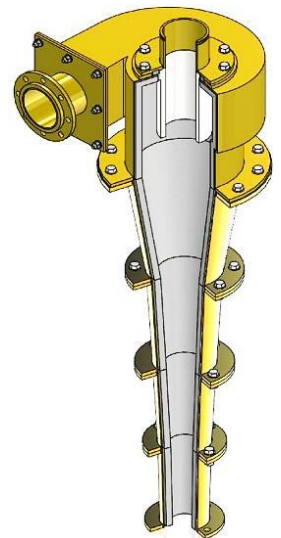

- ✓ Takes measurements of existing cyclones
- ✓ Selects suitable ceramics for each zone of the cyclone
- ✓ Ensures the connection with the existing installation
- ✓ Produces your lined cyclones.

Technical cyclones specifications are the same!

But:

- ✓ **3 to 5 times longer lifespan for bodies** compared to the best rubber linings
- ✓ **Up to 20 times higher for spigots** without significant change in particles sizing.
- ✓ **No lining unsticking** possible due to exclusive technology installation.
